Finishes

Wood owes its inherent beauty to variations in color, grain and texture. In our finishing process, we attempt to accent the natural beauty of wood. As a result there may be minor variations from one piece of wood to the next, even though they are finished by the same process. Samples may vary from the finished product due to these natural differences, as well as exposure to light and aging.

Frames and Shells

The colors on this card reflect actual production colors as closely as possible. While HON maintains strict color standards for paints and molded plastic parts from its suppliers, differing processes may result in slight color variations between materials. These variations are carefully monitored to assure color is within specifications.

NOTE: HON laminate colors are not available on all products. Please refer to current HON List Pricer for availability.

NOTE: Lead time may vary by shell color.

*Color may vary due to screen quality.
To ensure complete color accuracy,
please order a memo sample.*
